

# Curriculum Re-Architecture Summary

Updating our pathway sequence to align with active industry standards. This restructure establishes structural syntax isolation, embeds generative AI diagnostics safely into tracking logs, and culminates in rigorous live product code evidence and technical interview defenses.

## Program & Course Architecture Evolution

| COURSE        | PREVIOUS SYSTEM DESIGNATION | PROPOSED MODERNIZED FRAMEWORK   |
|---------------|-----------------------------|---------------------------------|
| Program Title | Web Developer Certificate   | [Advisory Choice Input]         |
| CIT 82        | Intro Web Development       | Intro to AI and Web Development |
| CIT 85        | HTML and CSS                | HTML and CSS                    |
| CIT 60        | Visual Basic                | Coding Concepts                 |
| CIT 93        | JavaScript                  | JavaScript                      |
| CIT 28        | Client/Server Databases     | SQL                             |
| CIT 84        | Web Frameworks              | Agentic Web Development         |

## Action Item: Program Branding Selection

### ADVISORY CHOICE INPUT

The committee is requested to evaluate and authorize a choice among the three final candidate program titles currently under review for the state-level curriculum revision:

☐ AI-Skilled Web Development

☐ Emerging Web Technologies

☐ Web Development
